Experience

2024 - Today

WalletConnect | Senior Product Designer

- Operate as the sole designer embedded in a 15+ engineer team — owning design across 8+ products simultaneously
- Build AI-powered coded prototypes for usability testing
- Lead end-to-end research: interviews, usability tests and synthesis, tested on realistic coded prototypes.
- Shape the UX for WalletConnect Pay — designing end-to-end payment flows for a Web3-native checkout experience

2021 - 2024

Ledger | Senior Product Designer

- Led design on Ledger Recover — a self-custody backup product — reworking its funnel for a ~30% lift in acquisition.
- Grew monthly active NFT users by x8.6 in 2 years
- Contributed to a full product rebranding and built a new design system

2023

Batis.io | Product Designer

- Provided UX/UI support on key products.
- Led UX research to align new features with real user needs.
- Built a design system from scratch for consistency and scale.

2020 - 2021

Banco Itaú | UX Designer

- Built, from scratch, an anti-money-laundering platform covering 10+ banking products (credit cards, loans) so analysts can detect suspicious activity.
- Ran in-depth user research — interviewed many Itaú fraud analysts to understand how they review customer transactions.

2018 - 2020

Toptal | UI Designer

- Worked as a freelance UI designer for international brands, including Dior, Emaar and Unilever.

Summary

I'm a Senior Product Designer and Design Engineer. For 8+ years I've designed complex products in crypto, fintech and hardware, and the job is the same everywhere: make complicated things feel simple.

I work end to end — user research, UX/UI and design systems — and I'm comfortable getting close to the code to ship it.
